#### **Course Description**

Provide a brief overview of what is covered during the semester. This information will appear in the printed catalogs and on the web online catalog.

Companies routinely gather massive amount of customer data, which requires marketing modelers to translate that data into information that may be used to make fact-based strategic and operational decisions. Marketers are challenged to illustrate and demonstrate the financial return and measurement of their actions. In this sense, marketing dashboards and metrics are becoming more important. In the course this challenging process for the marketers are examined.
